

Through its **Speakers Bureau**, NASSMC assists in provided speakers for its member coalitions on a wide variety of topics related to mathematics and science education, education systemic reform, building community, general systems theory, engineering change, systems design, content standards, science and mathematics curricula, and instructional strategies.

NASSMC's Speakers Bureau draws from present and former staff members, state coalition directors, and allied Washington area professional

organizations. In many cases speakers are provided to NASSMC affiliates at no charge. However, fees and/or expenses are charged by some speakers.

NASSMC will also assist member coalitions and other groups in securing nationally recognized experts or well-known personalities from the government, education, business, and communication fields.
